Summary

M.S. in Data Science graduate with hands-on experience applying statistical analysis, data visualization, and automation to operational, research, and large-scale analytics projects. Experienced in building reporting dashboards, automating data validation and reconciliation workflows, and analyzing datasets to identify trends and support data-driven decisions. Skilled in Python, R, SQL, Tableau, Excel, exploratory data analysis, and statistical modeling.

Experience

- **Compass Education** — Los Angeles, CA
  Administrative Coordinator (Data & Mailing Operations) — *August 2024 – Present*
  - **Implement data validation and reconciliation workflows** across 5+ SKU categories, standardizing inventory records and reducing stock discrepancy incidents by 30%.
  - **Automate analysis of 12,000+ biweekly and monthly mail volume records**, consolidating recurring operational data into leadership dashboards that identified seasonal shipping patterns, and optimizing demand forecasting reports for 10+ client groups.
- **Mac Repair Clinic** — Los Angeles, CA
  Technical Support Analyst — *October 2024 – Present*
  - **Build and maintain a structured parts inventory database that tracks 100+ reusable components** by model, specification, and condition across a bin classification system, reducing retrieval time and eliminating mislabeling errors.
  - **Diagnose and perform root-cause analysis on 50+ hardware failures each month,** identifying recurring failure patterns across device models and translating findings into clear repair recommendations.
  - **Apply data-informed process improvements** that reduce average resolution time by 20% and strengthen overall repair operations.
- **UCLA Education & Information Studies** — Los Angeles, CA
  Data Analysis Research Assistant — *September 2023 – August 2024*
  - **Designed a Google Sheets reporting infrastructure** to organize and analyze student performance patterns across 500+ datasets, accelerating research insight delivery by 40% for a California K-12 longitudinal study.
  - **Conducted multiple regression models in R** on a 2,400-student dataset to evaluate relationships between student outcomes and key educational factors and synthesized statistical results to communicate methodology, results, and implications to the research team to support evidence-based K-12 policy recommendations.

Skills Summary

- **Languages** — Python, R, SQL, HTML/CSS/JavaScript
- **Data Analysis** — Pandas, NumPy, Statsmodels, Scikit-learn, Exploratory Data Analysis
- **Data Engineering** — PySpark, Apache Spark, Parquet, DVC, ETL Pipelines, Large-Scale Data Processing
- **Reporting & Visualization** — Microsoft Excel, Tableau, Data Visualization, Dashboard Development, R Markdown
- **Professional** — Cross-functional Collaboration, Technical Communication, Process Optimization, Problem Solving

Projects

- **Steam Player Retention & Pipeline and ML Analysis: [PySpark, Python, DVC, Parquet, Expanse, HTML/CSS]**
  - Engineered an end-to-end analytics pipeline for 1.2M+ player profiles and 43GB+ of Steam behavioral data, integrating ingestion, data-quality auditing, feature engineering, and train/test splitting using PySpark and Python.
  - Led front-end development of an interactive analytics website, structuring dashboards and project findings into a cohesive user experience that translated complex data-science results for technical and non-technical audiences.
- **COVID-19 Deaths & Poverty Regression Analysis: [R, R Markdown, Statistical Analysis, Data Visualization]**
  - Analyzed 2,634 county-level observations across 53 variables to evaluate the relationship between COVID-19 deaths and poverty rates, using descriptive statistics and distribution analysis to identify patterns and assess data characteristics.
  - Built regression visualizations and conducted correlation, linear regression, and residual analysis, evaluating model fit through the correlation coefficient, p-value, and R^2 to interpret the strength and limitations of the relationship.

Education

- **Master of Data Science** — La Jolla, CA
  University of California, San Diego
- **Bachelor of Statistics & Data Science** — Los Angeles, CA
  University of California, Los Angeles
